Education

Nara Institute of Science and Technology

Nara, Japan

PHD CANDIDATE IN CYBERNETICS AND REALITY ENGINEERING (CARE) LAB

Oct. 2024 - Sep. 2027 (estimated)

- **Nara Institute of Science and Technology** — *Masters Student, Oct. 2022 to Sep. 2024*
- **Nara Institute of Science and Technology** — *Research Student, Apr. 2022 to Sep. 2022*
- **Research theme: Therapeutical Applications of Location-Based Games on Hikikomori Resocialization**
Developed a full-scale Location-Based Game (LBG) in Unity; integrated MapBox API for geospatial features and independently architected C#-based combat systems and UI frameworks.

Federal University of Rio de Janeiro

Rio de Janeiro, Brazil

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, FINAL GRADE 7.5/10.0

March 2012 - May 2019

- **Goldsmiths, University of London**, London, UK — *Year Abroad 2015-2016*

Experience

Premium Arts Inc.

Tokyo, Japan (Remote)

UNITY XR ENGINEER INTERN

Apr. 2026 - Current

- Develop and maintain user interfaces for commercial mixed reality applications using Unity UI Toolkit and uGUI.
- Implement new UI features and usability improvements in collaboration with designers to enhance user experience.
- Contribute to the architecture and implementation of production Unity XR applications for commercial clients.

MedRoom

Remote

SENIOR UNITY DEVELOPER

Jul. 2021 - Aug. 2021

- Engineered a VR anatomical education system featuring dynamic data-binding between 3D human models and interactive UI panels.
- Led a small team through the migration of a VR application from Unreal Engine to Unity, architecting a reusable spatial UI framework using ScriptableObjects for scalable data management.

Accenture Brazil

Rio de Janeiro, Brazil

APPLICATION DEVELOPMENT ANALYST

Mar. 2021 - Jun. 2021

- Developed enterprise cloud integration solutions using Oracle Integration Cloud (OIC), integrating business systems and enterprise workflows.

Galt Capital Investment Consulting

Rio de Janeiro, Brazil

IT MANAGER/LEAD DEVELOPER/ASSOCIATE

Jul. 2018 - Dec. 2020

- Led software development and IT operations, designing internal databases and systems using Node.js, SQL, C#, and VBA.

LabOceano - COPPE/UFRJ

Rio de Janeiro, Brazil

DEVELOPER INTERN (PART TIME)

Mar. 2017 - Sep. 2017

- Engineered a physics-based buoy and rope system in Unity, implementing tension limits, fluid buoyancy logic, and oil-spill interaction physics.
- Developed a multi-camera virtual CCTV system for maritime navigation simulations, enabling simultaneous real-time viewpoints for vessel operators.

Goldsmiths, University of London

London, UK

RESEARCH INTERN

Mar. 2016 - Sep. 2016

- Co-developed a game design tool in C++ and Java that translates VGDL programming language into prototypes for non-technical designers.

Skills

Engines	Unity (Advanced), Unreal Engine (basic), Processing
Programming Languages	C++, C#, Python, Java, JavaScript, Visual Basic, SQL, React
Tools and Frameworks	Git, Node.js, React
Systems & Patterns	OOP, Design Patterns (Singleton, Observer), ScriptableObjects
Specializations	VR/AR/XR Development, Gameplay Mechanics, Physics Simulation, UI Programming
Languages	Portuguese (native), English (near-native/C2 Level), Spanish(intermediate), Japanese(intermediate, JLPT N3)

Freelance Projects and Part-Time Experience

Active Gaming Media

Osaka

LOCALIZATION QUALITY ASSURANCE (LQA)

Dec. 2023 - Current

- Performed localization quality assurance for commercial games, identifying linguistic defects and UI issues in Brazilian Portuguese builds.
- Collaborated with development teams to ensure correct text-to-asset mapping and verified text positioning across different screen resolutions.

Selected Publications
